

Hurricane Katrina Bible Codes Matrix

by Roy A. Reinhold, February 2006

In late August of 2005, hurricane Katrina devastated Louisiana and Southern Mississippi, and especially New Orleans whose Ninth Ward had water up to the roof lines. As of January 18, 2006 the official death toll is 1417, with 3200 people still unaccounted for. About 230 of the fatalities were in Mississippi, 12 in Southern Florida, and the rest in Louisiana. Over 1.5 million people were displaced by Katrina, and 3 million were left without electricity.

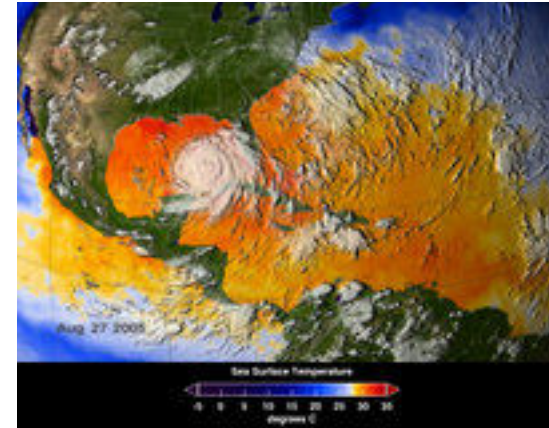

Hurricane Katrina approached New Orleans as a category 5 hurricane with 175 mph sustained winds at 7am on August 28, 2005; and it made landfall in Louisiana at 6:10am on August 29, 2005 as a category 3 hurricane with 125 mph sustained winds. Surprisingly, it turned slightly to the East and weakened within the 24 hours before landfall. That was a very fortunate turn of events for New Orleans. Although Katrina became the most costly hurricane in history (estimated \$100 billion in damages, next highest was Andrew in 1992 with damages of \$45 billion in 2005 dollars), had the storm struck New Orleans as a category 5 hurricane, the damage would have been much higher—maybe even totally wiping out New Orleans as a city forever.

Katrina formed as a hurricane in the area of the Bahamas on August 23, 2005, and crossed over Southern Florida just north of Miami as a category 1 hurricane. It spawned several tornadoes and led

to 12 fatalities in Florida. Once in the extremely warm waters of the southern Gulf of Mexico, it quickly grew in size and intensity. The graphic here shows the surface water temperatures existing when Katrina was in the Gulf of Mexico.

Current hurricane theory posits that extremely warm water at the surface feeds energy into the hurricane and strengthens it. That's the reason we don't have hurricanes all year round, since colder waters do not feed energy into tropical storms but keeps them small and harmless. Another newer theory is that the electrical interaction between the sun and earth feeds energy into a hurricane from above. Of course, we could find out in the future that both play a part in hurricane formation and intensification.

New Orleans actually came through the 125 mph winds of the hurricane reasonably well until the levees breached in a number of places. A huge empty steel barge in Lake Pontchartrain broke free and was blown like a frisbee across the lake and created a huge rupture of the levee. Additionally, in other places the levees had insufficient deep moorings and the wet earth actually became plastic-like, and slid the levee 20-35 feet and opened up ruptures.

Was the USA federal government responsible for the poor levees? Actually, during the Clinton Administration, over \$65 million extra dollars were authorized to rebuild and strengthen the levees in New Orleans. However, the Louisiana State legislature and City of New Orleans opted to use that federal money to build new gambling casinos

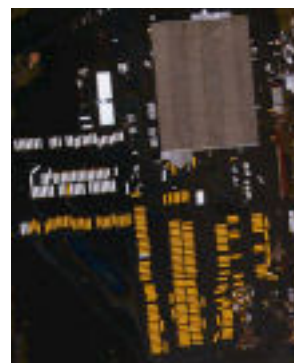

and their related infrastructure (pierside) in New Orleans. None of the money was actually used to improve the levees in New Orleans. I guess they decided that gambling casinos would permanently increase money going to their coffers and that they could later improve the levees.

We all saw the extensive TV News coverage of the Katrina aftermath, where some 25,000 less mobile people of New Orleans sought refuge to ride out the hurricane in the Superdome. Although the Superdome lost part of the roof covering, it still provided good shelter from the storm. The picture on the left is from the elevated expressway passing near the Superdome.

Mayor Ray Nagin of New Orleans and Governor Kathleen Blanco of Louisiana shouted that the USA federal government had failed in their duties. Mayor Nagin said, “How come there were no buses to take these people out?” Yet, the clear evidence is that Mayor Nagin and his staff are the ones who failed during the crisis.

Notice in the picture on the right, that there were ~450 city and school buses only a half mile from the Superdome sitting unused and under water. Only the tops of the buses are showing. These buses were sufficient to have taken all 25,000 people in the Superdome out of the city before the hurricane hit. And what was Mayor Nagin's excuse? He said that the poor of New Orleans deserved comfortable buses with cushioned seats to evacuate them, like those used by tour companies or Greyhound, and besides no one had told him he needed to schedule drivers to evacuate people. He was the mayor, and it was his responsibility. He failed, mainly because the levees had never broken before; so he and his staff were lulled into not taking decisive action to evacuate, but rather decided to ride it out.

In the aftermath, there were 25,000 people in the Superdome with no electricity and little water or food. Yet the State and FEMA responded fast, moving in truckloads of water and food which were on pallets on the elevated interstate only a half mile from the Superdome, within 24-36 hours. FOX and other newscasters showed the food and water which was being heavily guarded by direction of Governor Kathleen Blanco. Her direct order was NOT to distribute any food or water to those in the Superdome, because she wanted to move them out of the New Orleans area. The food and water sat there close by under heavy guard while the people in the Superdome suffered.

On TV newscasts, we were told that there was widespread lawlessness, killing and raping going on in New Orleans. However, this too turned out to be a huge exaggeration. The area-wide morgue for New Orleans reported later that less than 10 people died of gunshot wounds (I believe the final figure was 6 deaths due to gunshot wounds). Therefore, the reports of gangs shooting many people was a total fabrication. Likewise, the police never lost total control in the Superdome, and reports of murders and rapes there were greatly exaggerated. Yes, maybe one happened, but how can one crime turn into 10's and hundreds on TV newscasts? The TV newscasters just made it up and spread rumors, although Mayor Nagin likewise repeated these rumors initially. Later, he said it was incorrect and apologized. The fact is that the TV newscasters slandered the people of New Orleans and other hard hit areas by passing off untrue rumors as fact, when in fact most people there acted far more responsibly than portrayed.

My purpose in telling the true story about hurricane Katrina and the aftermath is to warn you that when large natural catastrophes occur, you need to be self-sufficient while providing aid to others when possible. The city, state or national government is not going to magically rescue you and make it all better immediately. Worldwide, when people are confronted with catastrophe, they are prepared and pitch in to help. Those who have at least a couple of days of water and food are able to take care of themselves and not be a burden on the system. Is it really so difficult to have water and food (that can be prepared or eaten when there is no electricity) on hand for a week or two when things are in chaos? In the old days, every family had these basics covered.

The “Berkey” water filter system works by gravity and can turn water from a stream, lake, pond or river into pure drinking water. One can even use mud puddle water and get pure drinking water (units cost \$150-300 depending on the model, I have the Big Berkey shown on the right) by running it through the Berkey. This system will provide anyone with unlimited pure drinking water as long as you have a source of impure water to filter. With the Berkey system, one does not need large water barrels.

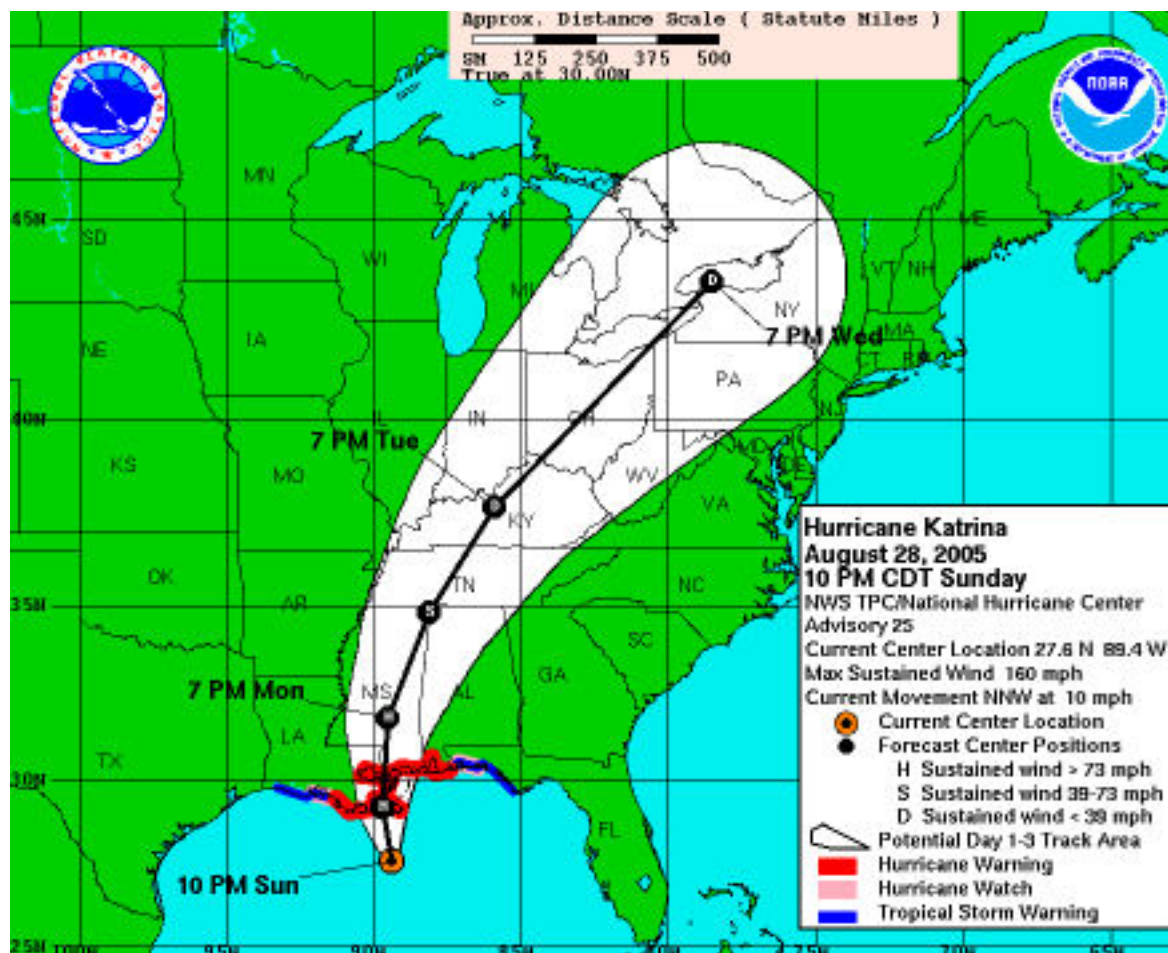

Likewise, one can obtain an inexpensive solar oven for ~\$150 (Sport Model) and up with reflectors, that will enable cooking meals and heating water for no cost when the electricity is out, as long as there is sunshine (Global Solar Oven on right at ~\$200). The Global Solar Oven gets to 300-400 degrees F. I recommend these two inexpensive means to provide for yourself and others in case of catastrophes. With a Berkey water filter and solar oven, then food becomes less of a problem, since one can cook or bake anything available. With just the above and a 5-lb bag of flour, one can make fresh made flat pan biscuits for a couple of weeks. Lentils and beans are easily cooked and store for a long time as does rice. With the Berkey filter for water and a solar oven, you can have a very inexpensive food store that will provide for your needs for an extended period of time. Think about it and use the internet to find a best deal on the Berkey and solar oven (shop wisely, prices on the same item varies greatly on the internet). We live in interesting times; and large scale natural catastrophes seem to be increasing. Be proactive!

Now to the meat of the issue, what was my intention in doing a Bible code matrix on hurricane Katrina? I did not just want to find out whether there would be a very descriptive matrix on Katrina, but wanted to find out whether a matrix on it would reveal some new interesting things. At the end of the article, I also have an X-Files type motive on possible use of scalar waves to steer the hurricane. This concept arose after reading articles by LtColonel (retired) Tom Bearden and others who provide scientific evidence and anecdotal stories that the USA and certain other countries do have the

capability to augment and steer large storms (Russia has openly boasted about it). Would a Bible code matrix shed any light on this X-Files type scenario? Maybe.

To buttress my view that New Orleans came out better than was expected, look at the official NHCC track on the right. Notice that at 10pm on August 28, (just 8 hours before landfall) sustained winds were still 160 mph. Katrina dropped to 125 mph sustained winds in just 8 hours. I would call them “lucky”. The slight turn to the East impacted Mississippi more than expected. The graphic helps to bring to remembrance actual events that show up in the Bible code matrix that follows—that is the weakening and turning.

To initially locate the correct matrix, I used the Hebrew spelling for Katrina (קטרײנה) used in all

Israeli newspapers and magazines. Another researcher, Moshe Shak, follows an antiquated rule where the “t” in Katrina has to be a tet instead of a tav because ultra-orthodox Jews believe the tav is more holy and it cannot be applied to names of non-Jews. Even though all Israeli newspaper articles used the tav for “t” in Katrina, Moshe persists in this rule. As you will see, the following matrix is far better than his, and that's because of his incorrect rule for spelling a name (you can see Moshe's simpler matrix in a recent edition of the free Bible Code Digest newsletter on their site). I mention this issue of name transliteration spelling, because I want to dissuade people from following Moshe's rules in spelling names, which continually is proven incorrect (I am not citing this issue to embarrass him, since he is a nice person and does have a lot of good advice to offer Bible code researchers).

I also looked for the words hurricane (הוריקן), USA, 24 Av and the day before and after (23 and 25 Av), the year 5765 (התשסה), and the term “they shot” (ירו) related to gang shootings in the hurricane aftermath. These were sufficient terms to find the correct matrix. My search text was the Torah (first 5 books of the Bible), and I used a toroidal Torah search (where the text is a circle and not a straight line). I mention the procedure to find the correct matrix, because it helps to have a sufficient number of terms to quickly identify the correct matrix. We then assume that this matrix will have all the necessary additional terms to flesh out the matrix (since we are not of those who wonder whether the Bible code is true—we know it is true). It's all a matter of matrix development from this initial finding.

The initial term “Katrina” turned out to be a gold mine when expanded. It told us that the turning of the hurricane and weakening were as a result of mercy. Mercy due to what? Perhaps the prayers of God's people.

תחנן נשול עוי קטרינה The dropping off will be merciful. Turn Katrina!

From this term, it appears that the drop off in intensity is by the hand of God, as is the slight turn from a direct hit on New Orleans. I will explain the usages here for one term, so that you can see it is

proper Hebrew. The first word is “takhon” which is a Qal 2ms imperfect meaning “you will be merciful” from the root word “khanan”, and attested as a spelling in Psalms 59:6. The second word is a Qal 2ms passive participle “nashul” meaning, “dropping off”. The third word is “avvi” which is a Piel 2fs Imperative meaning “Turn!” from the root word “avah”. Grammatically, the word usages and spellings are correct; and gender usages match the verbs. More important though, the meaning of the main term confirms what we actually witnessed concerning hurricane Katrina—the dropping off in strength of the storm and turning in the 8 hours prior to landfall. I think the main term extensions supremely witness to the existence of the Bible code (for those who are skeptics). If this were randomness, then we would not expect to find extensions that accurately describe what took place with hurricane Katrina (if we were able to extend it at all).

The following page is the Katrina matrix report, which shows all the terms in the matrix. I arranged the terms in the matrix report so that general terms are at the top and those X-File type terms are grouped together at the bottom. There are plenty of terms in both categories. One should not think that the matrix as developed comprises all possible terms in the matrix. I merely stopped developing it at this point since it shows enough to clearly make the desired points. Following the matrix report, I will discuss and explain the terms as necessary.

The graphic on the right is hurricane Katrina taken by NASA satellite on the afternoon of 28 August, 2005, about 12 hours before landfall. The eye of the hurricane is distinct. At that time sustained winds were 175 mph; and it was a category 5 hurricane. Note the tremendous size where the Yucatan Peninsula of Mexico is affected in the south, and LA, MS and AL are already receiving storm effects in the north.

Term in Hebrew	Translation	Skip	RFactor (in Matrix)	Start Letter	
תחנן נשול. עוי קתרינה!	The dropping off will be merciful. Turn Katrina!	56872	9.467	11.130	Genesis 12:5.32 Deuteronomy 4:24.6
הוריקן	hurricane	113742	-3.448	-1.785	Leviticus 3:14.21
עלו אדר הגל. חוי, מכד אב קמ להומ לה אוה.	The splendor of the waves grew/went up. Dedare, from 24 Av it arose (waves) to destroy her lust/desire (in New Orleans?).	28433	24.107	25.770	Numbers 4:8.6
באת, לוח הה! הי כה אב.	You came/entered (Katrina), a schedule of woe! the lamentation of 25 Av.	-56874	5.647	7.310	Numbers 24:9.26
יה חכוי, מה ילדו? ושאמ ממרי. כה נהג יה לה מאי, מני.	Yah was waiting, what did they birth? And that people is from rebellion. Thus Yah drove out of her from the island, Meni (god of destiny). (from the island of New Orleans?)	56873	29.904	31.566	Leviticus 23:16.47
ומטה שא! מה הא אמ? וינער.	And the rod, lift up! Why this people? And he will empty (it).	28434	9.774	11.436	Exodus 20:18.57
תתה ציני כי ארהב.	You brought my waymark for the USA.	4	9.275	10.938	Exodus 2:5.2
הזיו אורה ב ארהב פלד.	The radiance/glory I will make naked in the USA of steel.	56874	9.813	11.476	Deuteronomy 31:6.39
לבדה כנ אב מה?	To invent/concoct of 23 Av, what?	-56872	2.563	4.225	Deuteronomy 4:23.48
תשסה תהרי.	You will flow in year 5765 (2005).	56882	-0.285	1.378	Exodus 37:27.20
מיכ פעמ. כלו ארהב; מסד יבא.	Your waters beat/pulsated. They failed the USA; it will carry away foundations (of levees).	28440	13.946	15.609	Exodus 14:27.69
זבו כה אב, הי לשי!	They gushed out (levees?) on 25 Av, a lamentation for the present/gift!	-28443	4.385	6.048	Leviticus 15:7.11
כו אב נכפו. ככ נהר קשע.	They were coerced/forced on 26 Av. Thus it gathered together the river.	-56870	10.532	12.195	Leviticus 13:38.10
הי על הוריקן חתה, וירו היא.	Lamentation concerning the hurricane of terror/fright, and they shot in it.	56875	12.634	14.296	Genesis 30:29.36
כה בש אווננ. ונר תרי ארהב, שלב של. ותפוק.	Thus, he was ashamed of their misfortune. And the light of one who tours the USA (Mr. Brown of FEMA?), he inserted error/offense. And she reeled/tottered (New Orleans and the affected area?)	28435	25.065	26.727	Numbers 24:9.12

The following terms that appear to indicate that hurricane Katrina was artificially enhanced and steered.

חוי מכד אב קמ להומ לה, אוה.	Declare, from 24 Av the enemy is to destroy her, he desires (it).	28433	12.264	13.926	Leviticus 3:14.27
מרא היו לארהב בתתה, או, קמ דעה זיר.	They were bitter towards the USA when making it, or, an enemy of bundled knowledge (internet).	28439	20.052	21.714	Leviticus 11:26.68
הכו, תפש מכ חל רהבי ארהב.	They struck, seizing from you the profane/secular pride of the USA.	2	16.049	17.711	Exodus 14:28.17
ארח כד אב אתוה. הו די בל חסיי. אכ בכל גד אמ.	I will outline the path/behavior of 24 Av. Alas! Enough! not those who trust me. Surely with all he attacked the nation.	56873	28.162	29.825	Deuteronomy 27:8.14
נכ. כולא כה אב.	We struck. He (God?) restrains (the hurricane) on 25 Av.	28432	1.873	3.536	Numbers 7:60.20
שרר כה אב שלח. הלל שולל קיר.	The enemy of 25 Av, it transmitted. He eulogized the stripped wall (levees?).	-28438	14.287	15.950	Leviticus 17:3.6
וארהב הרות. בלעמ מומ מחיא.	And it saturated the USA. The deformation of my strike/blow destroyed them (swallowed up them).	28439	13.677	15.340	Numbers 12:4.51
ושאי! נהגה, הפכ כתמ. ובסנפ מאמ לחת.	And lay waste! She was driven (hurricane), turning as a whole. And with it inserted, from the people is fear/terror.	-28436	22.475	24.138	Genesis 19:3.30

The ELS reference is 28436 characters between rows.

There are 23 displayed terms in the matrix.

The matrix is in the Torah, using a toroidal Torah..

The matrix has 77 rows, is 85 columns wide and contains a total of 6545 characters.

There are 22 significant terms in the matrix.

The matrix odds are 1 chance in 3.81656071150737E330 in favour of significance.

The cumulative 'R' Factor for the displayed matrix is 330.582.

It's amazing the depth of knowledge shown in this hurricane Katrina matrix. On the 24th of Av (29 August) Katrina made landfall and the waves rose to destroy (3rd term), both from the Gulf of Mexico and in Lake Pontchartrain. On the 25th of Av we learned that there was a major breach in the levees on Lake Pontchartrain caused by the large steel barge that flew across the lake like a frisbee and made a big opening in the levees. It truly was the beginning of a schedule of woes for New Orleans (4th term). The next term (term 5) addresses the state of the people affected (their beliefs), inferring that they are a people from rebellion. Isn't it true that New Orleans was always known as a place where voodoo, witchcraft and open homosexuality flourished? It states that God (Yah) waited for them (a long time?) to turn from their ways; and hurricane Katrina was a judgment against them. Meni is the ancient god of destiny (this is the way we are and will always be, attitude); and hurricane Katrina was meant to permanently change the people there (by driving out Meni).

The matrix continues to answer important questions concerning the “why” of Katrina. Term 6 states: *“And the rod, lift up! Why this people? And he will empty it.”* The rod of judgment was applied and New Orleans was emptied. The question for us to answer is, “Why this people?” The answer is apparent that it was due to their voodoo, witchcraft, rebellion from God, and open homosexuality—all the attributes for which New Orleans is known. But why southern Mississippi too? Perhaps it is because of the growing casino gambling and its attendant rise in other corruption due to gambling casinos? Isn't the spirit of gambling one of putting your money down to take a chance for “destiny” (false god Meni)? Terms 7, 8, 9 and 10 are self evident—Katrina was huge and a waymark, the hurricane certainly affected the USA, a question, and a year term. Terms 11 and 12 seem to be about the levees breaking, where the foundations of the canal levees failed because of insufficiently deep moorings along the connecting canals. It certainly began happening on 25 Av (evening of 29 August to the evening of 30 August).

Term 13 notes that the inhabitants of the affected areas were forced to take action on 26 Av due to extensive flooding, when the river and Lake Pontchartrain flooded extensive areas following the levee breaches. The Ninth Ward had water up to the roof lines, and there was widespread looting.

Term 14 notes that there was shooting taking place (by a few gangs), and the entire nation lamented the aftermath of hurricane Katrina. Term 15 seems to indict Mr. Brown, the head of FEMA for inserting offense with a cavalier attitude and his concern for appearing as a “fashion plate” rather than concentrating on rescues and emergency aid. The affected area tottered with thousands needing rescue by small boat from the attics and rooftops; and 25,000 people were in the Superdome without electricity, food, water and without much hope. (note: the matrix graphic is at the very end).

X-Files Type Terms

Where did I get this notion that hurricane Katrina might have been artificially enhanced and steered? And what would be the objective to do so? Perhaps to disrupt the economy of the USA by striking where many oil refineries and gas and oil wells are located?

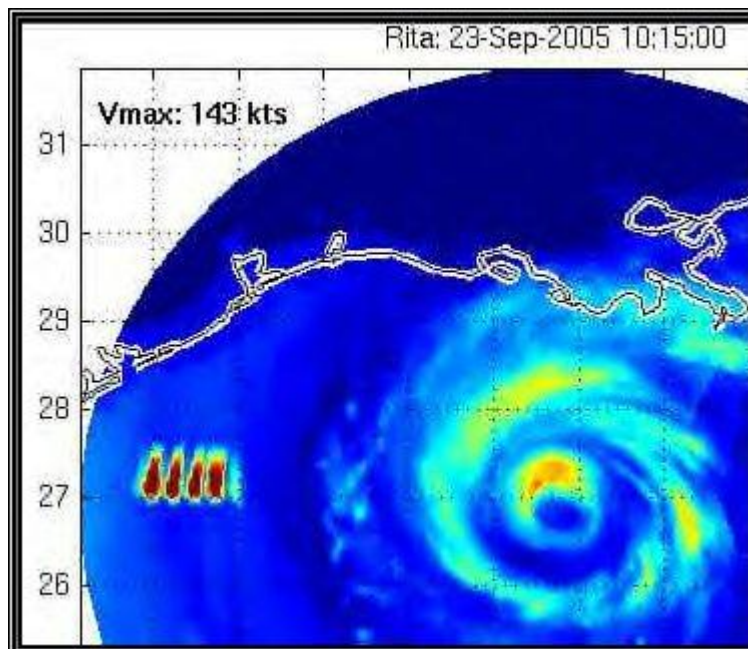

The “artificial enhancement and steering” scenario arose from 3 different sources. LtCol (retired) [Tom Bearden's website](#) has material about the use of scalar electromagnetics as weapons to affect the climate. Among others, he cites the following from a 1997 speech by Secretary of Defense William Cohen:

“Others [terrorists] are engaging even in an eco-type of terrorism whereby they can alter the climate, set off earthquakes, volcanoes remotely through the use of electromagnetic waves... So there are plenty of ingenious minds out there that are at work finding ways in which they can wreak terror upon other nations...It's real,...

Secondly, Scott Stevens was a professional meteorologist for 9 years and began to catalog strange weather phenomena as a result of scalar wave technology. On his website, [WeatherWars.info](#), he shows extensive pictures comparing normal clouds to the strange looking ones affected by scalar waves. This may seem “way out there”; but there is evidence, in addition to Russian boasts in news articles, that they had this technology.

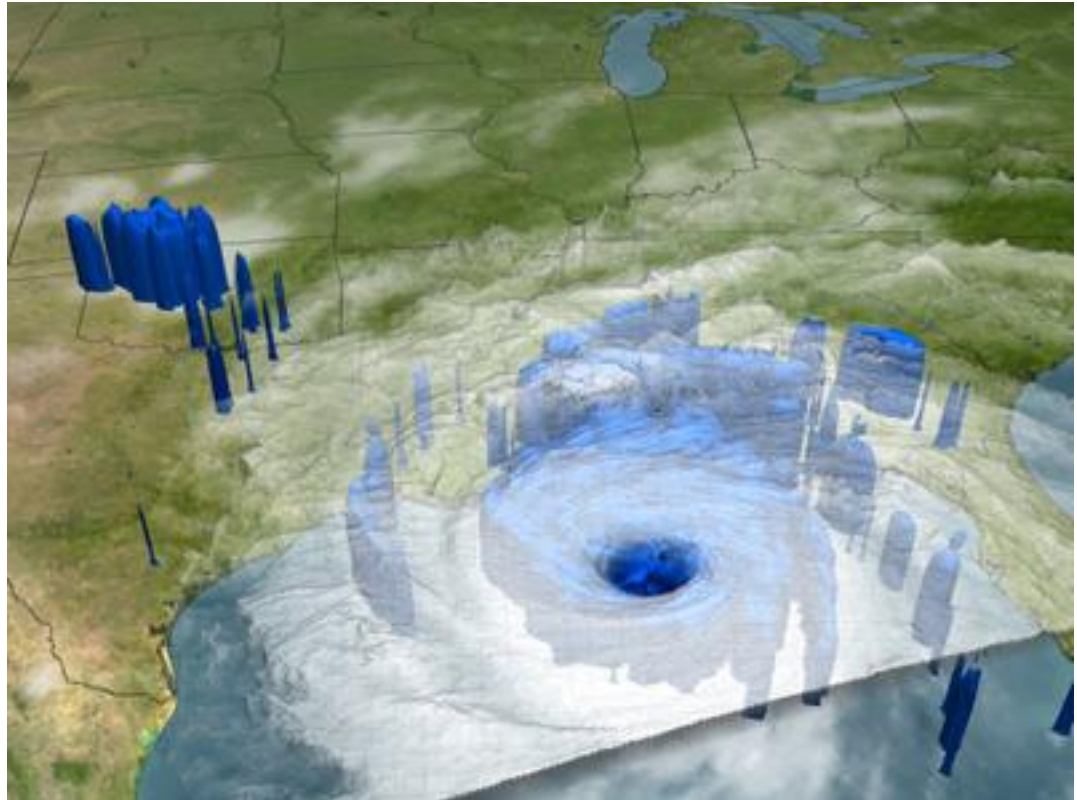

Thirdly, Richard C. Hoagland on his [EnterpriseMission.com website](http://EnterpriseMission.com), in the Captain's Blog for Sept. 26 and Oct. 18, 2005 shows extensive evidence of possible use of scalar waves in regards to both hurricane Katrina and hurricane Rita.

The graphic on the right is for hurricane Rita from the University of Wisconsin's CIMSS center, and shows an electronic fence in place (the 5 markers west of the hurricane). If you remember, Rita was headed to Galveston and then Houston, however, it stalled slightly and then headed north. The markers appear to be a fence to steer the hurricane and prevent it from going to Galveston or Houston. There are similar type effects seen for hurricane Katrina.

The graphic on the next page is for hurricane Katrina. It shows what appears to be a marker or fence on the NW side of the hurricane. The blue columns show rain intensity, and that is another way to discern a scalar electromagnetic fence, when there is a big group as in the area NW of Katrina. Is this concept real? We really don't know for sure; but since Russia boasted a few years ago—when there was a severe drought and forest fires in Indonesia—that they could create a monsoon to put out the forest fires (for a price). No one took them up on it—maybe it was too costly. Check out Tom Bearden's website, Scott Stevens' website, and the Enterprise Institute website for more information on the concept. But the question arises, “does the Katrina Bible code matrix show any evidence for this concept of artificial enhancement?” The answer is yes.

In developing the matrix, I did not expect to find evidence for this X-Files type scenario; but it seemed like a interesting offbeat thing to investigate. However, terms 16-23 all seem to corroborate artificial enhancement.

Term 16 shows there is an enemy of the USA whose intent is to destroy her. The question then arises, “is this enemy negative spiritual forces or is it another country or an international group outside the USA?” Term 17 further identifies this “enemy of the USA”

who has a bitter attitude towards the USA, and that they make it (the hurricane). I am guessing on what the “enemy of bundled knowledge” means, although the internet seems like a good choice. Term 18 says, “they struck, seizing the secular pride of the USA.” This further indicates to me that it is another country using earthbound technology to enhance and steer the hurricane.

Term 19 shows two different voices speaking. Taking into account earlier terms, the voice that says, “*Enough! Not those who trust me,*” identifies that voice as God who showed mercy and weakened the storm and turned it. Those who trust in me identifies Christians and observant Jews in

the area affected. Ominously, the other voice is the enemy who attacked and says “*with all*” he attacked the nation. Term 20 starts out with the enemy saying, “*we struck.*” Then it goes on to say that he (God) restrains the hurricane on 25 Av. Remember, in an 8 hour period the hurricane dropped from 175 mph to 125 mph sustained winds and turned slightly.

Term 21 tells us the enemy “*transmitted,*” which is in accordance with our theory of artificial enhancement of the hurricane using scalar electromagnetic waves. Further, it states that the enemy who did this expressed public sympathy (phony sympathy) over the levees failing and the extensive damage. Term 22 indicates it saturated the USA, and this may be rainfall; or it may indicate the creation of terror/fright concerning the loss of life and property. In a large area, hurricane Katrina certainly deformed the landscape, creating \$100 billion in damages. The last term (23) tells us the result of the enemy's actions—laying waste the land, killing people, and creating fear/terror. Also, it tells us the hurricane was intentionally driven and turned (artificially).

Summary: I started out on this matrix thinking it would disprove the theory that some group or country could enhance and steer a hurricane with devastating results. However, I think the matrix strongly indicates to me that someone did. The question is, “who?”

The answer for “who”: LtCol Tom Bearden states that 10 nations have the scalar technology to modify weather to some degree. The theories bandied around propose that Russia has furthest developed the technology, but may have sub-leased it to the Yakuza (Japanese mafia), or the Aum Shinrikyo (apocalyptic cult who used sarin gas on the subways in Japan in 1995) for millions of dollars so as not to have their fingerprints on the act. This theory cites some deep-seated Japanese resentment (not by the Japanese government) against the USA for WW2 by the wealthy Yakuza mafia. The Aum Shinrikyo motive is to initiate the apocalypse—a central belief of the their cult and the reason they used sarin gas on the subways in 1995. While these theories seem so far out there as to be ridiculous, I decided to look for Russia, Yakuza, and Aum Shinrikyo in the Katrina Bible code matrix. I did not find Yakuza or Aum Shinrikyo at all in the matrix; however, “Russia” רוסייה,

crossed the matrix above and below the main term. That presence in the matrix doesn't necessarily mean we have a guilty verdict for Russia.

Term 24: שמו התו רוסיה ותו אפ בר

translation: They formed/established the sign/mark of Russia and the sign/mark of clear anger.

Term 25: מר רוסיה ובה העשת מקלי

translation: Russia is bitter; and against her (USA) is the one who applies/commits my rod (God's judgment).

Neither of these two additional terms are shown in the matrix or matrix report; because I pondered whether I really wanted to show them. Do they show that Russia probably did it? Yes. Am I 100% sure of that accusation? No. However, they seem to clearly show that Russian weather manipulation enhanced and steered hurricane Katrina. Perhaps this explains the terrible hurricane season in Florida in 2004; and in 2005, the odd movements of Ophelia as well as Katrina and Rita striking where there are many oil refineries and oil & gas wells in the Gulf of Mexico.

Odds: The matrix odds (if all terms were *a priori*, which they are not) are 1 chance in 3.8 times 10 to the 330th power (based on total matrix R-value of 330.582).
